- Agile Methodology
- MERN Stack
- SQL
- Communication
- Flexibility
- Teamwork
- Problem-Solving
- Creativity
- Analytical

Experience

Resilient Coders

Feb 2023 - Present

Software Engineer

- Successfully designed and developed full-stack web applications using a combination of HTML, CSS, and JavaScript, showcasing a strong understanding of front-end and back-end technologies
- Demonstrated exceptional debugging skills, efficiently resolving several complex issues and ensuring smooth functionality throughout the development process, while adhering to industry best practices
- Actively participated in an open and collaborative team environment, consistently contributing innovative ideas and solutions to fellow software engineers, resulting in improved project outcomes

Projects:

- Contributed to the back-end development of the [Community Catalyst](#) app, enabling easy connection, organization, and impactful engagement for black and brown communities, fostering activism, collaboration, and mission-driven impact.
- [Demo Day Project](#)

Granite Telecommunications

Sept 2022- Jan 2023

Project Coordinator

- Created and updated 3 automated project management dashboards to track progress and completion, providing real-time insights and facilitating effective communication for over 50 projects managing 4 product features
- Collaborated on cross-product and cross-department projects, actively assisting in behind-the-scenes tasks to support project managers in successfully delivering a wide range of internal and external projects

Education

Year Up

2019 - 2020
